

In regards to petition RM-10354 I believe it would be in the best interest of the Amateur Radio community as a whole if those that began this petition would upgrade their amateur radio license. There are a lot of us that worked up through the ranks me being one of them (i.e. 25 wpm to pass amateur extra class and elements 4A and B) and I started out on 80, 40, and 15 meters on telegraph and upgraded from there. It seems to me that in the interest of the amateur radio community that upgrading your license has lost that special meaning.
